Organization Overview

Name : Retro vibe

History : “Retro vibe” is a local retail store which was created by a group of teenagers who felt the need to relive and style the beauty of “ old”, or what is now called vintage type of football jerseys. The Retro was brought together to allow football fashion enthusiasts to showcase their individual vibe. Created by the people, for the people.

Vision : From the beginning the vision of the retro vibe founders has been to become the most reliable vintage retail store in South Africa.

Mission : Our mission is to connect ourselves to the football and fashion communities in order to solidify our target markets within the country.

Website Goals and Objectives

Goals :

- join digital spaces
- sell retro pieces online
- network

KPI's (key performance indicators)

Tier 1: Daily Monitoring

- Website traffic & conversion rate

- Revenue vs. daily target
- Cart abandonment alerts

Tier 2: Weekly Review

- product mix
- Customer acquisition metrics
- Inventory movement (fast/slow sellers)
- Email campaign performance

Tier 3: Monthly Strategic

- Gross margin by product category
- Return rate analysis
- qualitative feedback
- Competitive positioning

Proposed website features and functionality

The website should contain a home page which introduces them immediately to the Retro experience, an About page which will illustrate our history and explain what we are about, A display page which showcases our top selling pieces which will attract them enough to feel the need to buy one as soon as possible, A products page where they are provided with details where they will provide a specific code for a piece they are looking for. A contact page that will direct them to our Email/ whatsapp for orders and queries regarding our service and pieces.

Design and User experience

The overall design of the website should be standard but intentional. The preferred color scheme for the website should be warm colors with hints of a cold color

Technical requirements
